DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 20, 22 and 24, drawn to a process for dispersing a pigment for paint, printing ink or pigment paste, and product thereof, classified in class 106, subclass 499.
 - II. Claims 10-19 and 23, drawn to an aqueous pigment concentrate and a coating system comprising the same, classified in class 524, subclass 80.
 - III. Claim 21, drawn to a method of improving the resistance of a paint to weathering, classified in class 106, subclass 14.05.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the pigment concentrate can be use in preparing printing ink or pigment paste.
3. Invention II is unrelated to Inventions I and III. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP §

808.01). In the instant case, the different inventions are not disclosed as capable of use together and they have different modes of operation.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. During a telephone conversation with Mark Russel on 3/31/03, a provisional election was made with traverse to prosecute the invention of Group II, claims 10-19 and 23. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-9, 20-22, and 24 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Specification

7. Applicant is reminded of the proper content of an Abstract of the Disclosure.

In chemical patent abstracts for compounds or compositions, the general nature of the compound or composition should be given as well as its use, e.g., "The

Art Unit: 1713

compounds are of the class of alkyl benzene sulfonyl ureas, useful as oral anti-diabetics." Exemplification of a species could be illustrative of members of the class.

Complete revision of the content of the abstract is required on a separate sheet.

Claim Rejections - 35 USC § 112

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 10-19 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors, and as such, it is entirely unclear what structure applicant is claiming for the functional groups Ia and Ib .

For instance, in claims 10 and 23, at least one of which the balance of the elected claim depend:

The definition for the variable X includes a group with a variable l_m , which is not define anywhere in the claims.

The variable "l" is defined in the claims but it unclear how this variable is related to in the structures, since the variable does not appear in the structure.

Claims 10 and 23 also define X as being represented by the groups

"-NHR² and/or -NR²₂ where R² = R¹ or -CO-NH₂ and also

-Q¹N-Q²-NQ³Q⁴ ...

Q³ and Q⁴ are aliphatic and /or alicyclic alkyl radicals".

Here, it is unclear what applicant means by "**and/or**" and "and also" in the definition for X, since only one X appears in the structure Ia at a time. How can one X be at the same time, two different groups.

10. No useful prior art search/determination was possible due to the general indefinite nature of the claim as indicated above.
